

8.21.08

Dick and Kristie,

Removal and site cleanup activities are scheduled for tomorrow at the Mushroom Express site, beginning at 0600 hours. I believe the work plan for the work was forwarded to you last week, with a request for comments. As no comments have been received to date, the work will be conducted in accordance with the plan.

>

I have also left voicemail messages for you both regarding the work, as well as with Marian Jones of your office.

>

If you have any questions about the planned activities, please feel free to give me a call.

>

Regards,

>

8.15.08

From Elizabeth Janes to internal staff and Rincon Orosco and Watenpaugh

Hello: Mr. Donius left me a voice mail asking me to transmit to you, since I had asked him to share his schedule with EPA and Rincon Tribe in the event that one or both might want to inspect, that he will have contractors on the site at the former Mushroom Express on Monday to install access risers to the septic tanks.

Neither Aaron nor I can be present for the event.

Please give me a call if you wish to discuss this further.

Elizabeth Janes

8.12.08

Hi Kristie - I'll be on travel for the next several weeks and wanted to let you know that my colleague Rich Martyn will be overseeing site issues. Rich Martyn is an OSC and I have briefed him on past and upcoming activities. Currently, Marvin Donius is contracting with a cleanup company to address the next phase related to removing the oil contaminated soils and other fire debris. This is based on the soil analytical data you received and some additional field screening that we conducted when I was on-site recently (the day we spoke).

This effort has not been scheduled, but may take place sometime next week and should last about one day. I know Mike Schwennesen has also been keeping you updated with schedules/activities and you should feel free to contact him. OSC

Martyn and Mr. Schwennesen will advise you as to this scheduling. The mapping and investigation of the septic system(s) is also in front of us and may also be completed in the next couple of weeks.

I still do not have the final report from Mr. Donius' consultant regarding the June sample data and since I will be out for some time I expect you will receive it before I do. Nevertheless, we already have the data which has allowed us to push this soil effort.

OSC Martyn can be reached at 415-972-3038 and Mike Schwennesen can be reached at 760-451-0886.

Hope you are well and will connect with you in September.....cb

8/5/08

Kristie - Mike should have already called you today on this. Sounds like he will have the septic company out tomorrow as well. I'm in Baltimore this week, but Mike will be on-site too.

Hello Craig

As you know from the emails, Marc, Mike and the person from Enviroserve are meeting at the site tomorrow. Also, the septic company will begin their work on Wednesday am. Thanks...Marvin
